Professional Summary

Junior Mechanical Engineering student at Cal Poly Pomona with experience in SolidWorks CAD, GD&T, mechanical systems, reverse engineering, and team-based design projects. Interested in renewable energy, nuclear power, thermal systems, utilities, and energy infrastructure. Seeking an engineering internship involving mechanical design, thermal-fluid systems, equipment, project engineering, or energy-system development.

Education

California State Polytechnic University, Pomona

Bachelor of Mechanical Engineering

President's List: 2024-2025, 2025-2026

Pomona, CA

Expected May 2028

GPA: 3.7

Relevant Coursework: Thermodynamics, Mechanics of Materials, Dynamics, Fluid Mechanics (in progress), Introduction to Design (in progress)

Projects

Lawn Edger Reverse Engineering

- Reverse-engineered a Briggs & Stratton combustion engine to understand component function, system interactions, and mechanical assembly.
- Led an 8-person team through engine disassembly, component documentation, CAD modeling, and assembly integration.
- Modeled engine components in SolidWorks and created assemblies, subassemblies, and engineering drawings using GD&T.
- Coordinated task assignments, scheduling, and quality reviews while adapting to project delays.
- Taught a teammate how to create CAD drawings and helped maintain consistency across project documentation.
- Received a **100% grade** on the final project for the completed reverse-engineering design and documentation.

Technical Skills

- **Software:** SolidWorks, MATLAB
- **Programming:** Python, JavaScript (Foundational Knowledge)
- **Engineering:** CAD Modeling, Assembly Design, Engineering Drawings, GD&T, Mechanical Systems Analysis, 3D Printing, Prototyping
- **Technical:** Basic Arduino, Wiring, Basic Soldering, Automotive Systems
- **Professional:** Team Leadership, Employee Training, Project Coordination, Quality Control

Work History

Yogurtland

Assistant Manager

Walnut, CA

April 2025– Present

- Supervise daily store operations and closing procedures while maintaining accountability for cash, inventory, and workplace standards.
- Train employees on operating procedures, customer service, sanitation, and closing responsibilities.
- Manage inventory, place product orders, and coordinate restocking to maintain uninterrupted store operations.
- Managed store operations during a surprise corporate inspection yielding a **98% evaluation score**.
- Coordinate fundraising events and support team performance during high-volume shifts.
